

Medication Dosing in Renal Insufficiency: A Review

Dates: 12/14/15 and 12/15/15
Time: 0700-0730 and 1430-1500

Continuing Pharmacy Education Program
Pharmacy Department (DI Conference Room)
Medstar Georgetown University Hospital
3800 Reservoir Road, Washington, DC 20007

Who should attend: The program is designed for pharmacists caring for patients at MedStar Georgetown University Hospital (MGUH).

Needs statement: Pharmacists should be familiar with medication dosing in renal insufficiency and dialysis to ensure proper medication dosing for safety and efficacy

Statement of goal: To increase familiarity of pharmacists with medication dosing in various stages of renal insufficiency including end stage renal disease and dialysis

Activity Type: Knowledge

Objectives: After completing the program, participants should be able to:

1. Interpret and assess different stages of renal dysfunction
2. Design medication dosing regimens for patients with renal dysfunction
3. Discuss principles of medication dosing in hemodialysis

Faculty:

Annelise Nolan, PharmD
Clinical Specialist, Solid Organ Transplant
Medstar Georgetown University Hospital
3800 Reservoir Road, Washington, DC 20007

Fee: N/A
