

Assessing Clinically Significant Drug-Drug Interactions

Dates: 1/15/16 0700-0730 and 1/17/16 1430-1500

Continuing Pharmacy Education Program
Pharmacy Department (DI Conference Room)
Medstar Georgetown University Hospital
3800 Reservoir Road, Washington, DC 20007

Who should attend: The program is designed for pharmacists caring for patients at MedStar Georgetown University Hospital (MGUH).

Needs statement: Pharmacists should be familiar with drug-drug interactions to ensure proper medication dosing for safety and efficacy

Statement of goal: To increase familiarity of pharmacists with clinically significant drug-drug interactions.

Activity Type: Knowledge

Objectives: After completing the program, participants should be able to:

- 1. Define the terms enzyme inducer, enzyme inhibitor, and enzyme substrate
- 2. Identify the top three classes of medications associated with DDIs
- 3. List the steps in analyzing a DDI
