COVID-19 In the Inpatient Setting: A Case Study and Review of Current Treatment Trends

Date: Tuesday, 06/09/2020 at 7:00-8:00PM

Continuing Professional Education

Who should attend: This program is designed for pharmacists and pharmacy technicians.

Needs statement: The novel Coronavirus COVID-19 has caused health care professionals to respond and adapt to a rapidly changing environment. This presentation will consolidate current treatment guidelines and review drug agents used to lessen the course of the disease. In addition, the demographics and disease trends of COVID-19 will be discussed. Finally, recommendations will be made to enhance pharmacy operations, and provide optimal care for patients hospitalized with suspected or confirmed COVID-19.

Statement of goal: To increase knowledge of pharmacists and enhance familiarity of technicians concerning management of COVID-19 and provide suggestions to optimize patient care and pharmacy operations.

Activity Type: Knowledge and Application

Objectives: At the completion of this activity, the participant will be able to:

Pharmacist Objectives:

- Discuss demographics and disease prevalence of COVID-19
- Outline, access, and recommend adjustments to enhance pharmacy operations in the setting of COVID-19
- Apply current guidelines and clinical knowledge in action
- Explain and introduce drug treatment options related to COVID-19

Pharmacy Technician Objectives:

- Explain demographics and disease prevalence of COVID-19
- Outline, access, and recommend adjustments to enhance pharmacy operations in the setting of COVID-19
- Explain and introduce drug treatment options related to COVID-19
