

HIV and Renal Disease – Treatment Adherence Challenges

Date: 1/28/2020

Time: 12:00 – 1:00 PM

Continuing Pharmacy Education Program Clinical Pharmacy Associates, Inc. & DC Department of Health HIV/AIDS, Hepatitis, STD, TD Administration

<u>Who should attend</u>: The program is designed for pharmacists in the DC HIV/AIDS Pharmacy Network and pharmacists in client organizations of CPA/MedNovations.

Needs Statement: Disease management of clients/patients with HIV/AIDS requires pharmacists and other healthcare providers to receive updates in healthcare delivery.

<u>Statement of Goal</u>: To equip the practicing pharmacist with current knowledge and understanding of topics integral to the care and safety of persons infected with HIV.

Activity Type: Knowledge

Objectives: After completing the program, participants should be able to:

- 1. List basic elements and risk factors for renal disease
- 2. Explain the association between HIV and renal disease
- 3. Outline antiretroviral therapy (ART) with recommended renal dose adjustments
- 4. Identify adherence challenges in people living with HIV (PLWH) and renal disease.
