

The Impact of Depression and Anxiety on Treatment Adherence in HIV Infected Patients

Date: 1/22/2019

Time: 12:00 – 1:00 PM

Continuing Pharmacy Education Program
Clinical Pharmacy Associates, Inc.

316 Talbott Avenue,
Laurel, MD 20707

Who should attend: The program is designed for pharmacists.

Needs Statement: Optimal medication management of clients/patients with HIV/AIDS requires pharmacists and other healthcare providers to receive updates in healthcare delivery.

Statement of Goal: To equip the practicing pharmacist with current knowledge and understanding of topics integral to the care and safety of persons infected with HIV.

Activity Type: Knowledge

Objectives: After completing the program, participants should be able to:

1. Discuss the importance of adherence to the success of HIV treatment
2. Recognize depression and anxiety as barriers associated with non-adherence to treatment in HIV-infected patients.
3. Discuss pharmacotherapy for depression and anxiety and the associated contraindications, precautions, class effects, and drug interactions.
4. Describe methods to improve adherence
