

## Advances in HIV Clinical Care- Antiretroviral Drug Update

**Date:** 8/25/2018

**Time:** 10:00 – 11:00 AM

Continuing Pharmacy Education Program  
Clinical Pharmacy Associates, Inc.

**Who should attend:** The program is designed for pharmacists.

**Needs Statement:** Optimal medication management of clients/patients with HIV/AIDS requires clinicians and agencies to receive updates on the scientific and clinical basis of pharmacotherapy and improvements in healthcare delivery.

**Statement of Goal:** To equip the practicing pharmacist with current knowledge and understanding of topics integral to the care and safety of persons infected with HIV.

**Activity Type:** Knowledge

**Objectives:** After completing the program, participants should be able to:

1. Describe the role of newer therapies in the HIV practice community based on National Guidelines and drug utilization patterns
2. Review FDA-approved new drugs used in the treatment and prevention of HIV infection
3. Discuss and illustrate the importance of select Safety-Related Drug Labeling Changes with antiretroviral drug therapies
4. Identify and discuss active research strategies and drugs for HIV/AIDS management
