

HUCOP Clinical Pharmacy Rounds: Management of Transfusion-Induced Iron Overload

Date: 10/14/2015

Time: 12:00 – 1:00 PM

Continuing Pharmacy Education Program
College of Pharmacy, Howard University
2300 4th Street, NW – CCH 207
Washington, DC 20059

Who should attend: The program is designed for inpatient and outpatient pharmacists caring for patients in various settings.

Needs Statement: To enhance knowledge of the management of transfusion-induced iron overload

Statement of Goal: To enhance knowledge of the management of transfusion-induced iron overload

Activity Type: Knowledge

Objectives: After completing the program, participants should be able to:

1. Discuss the pathophysiology and epidemiology of transfusion-induced iron overload
2. Recognize the common disease states that contribute to higher risk of iron overload
3. Demonstrate a sound understanding of the clinical presentation components of iron overload
4. Identify pharmacological and non-pharmacological management options
5. Apply the principles of pharmacokinetics and route of administration for appropriately recommending iron chelators to enhance their effectiveness and increase patient compliance
