Updates on Antiretroviral Use in PLWHA

Date: 2/25/2020   *Time:* 12:00 – 1:00 PM

Continuing Pharmacy Education Program
Clinical Pharmacy Associates, Inc. &
DC Department of Health
HIV/AIDS, Hepatitis, STD,
TD Administration

Who should attend: The program is designed for pharmacists in the DC HIV/AIDS Pharmacy Network and pharmacists in client organizations of CPA/MedNovations.

Needs Statement: Disease management of clients/patients with HIV/AIDS requires pharmacists and other healthcare providers to receive updates in healthcare delivery.

Statement of Goal: To equip the practicing pharmacist with current knowledge and understanding of topics integral to the care and safety of persons infected with HIV.

Activity Type: Knowledge

Objectives: After completing the program, participants should be able to:

- Explain the history of antiretroviral drug therapies in the USA
- Classify the list of current available FDA-approved antiretroviral (ART) drugs by class
- Identify recent FDA-approved ART drugs and their place in therapy
- Summarize the key guideline updates regarding ART drug therapy
- Explain highlights of recent safety-related drug labeling changes in HIV treatment
- Outline the 90-90-90-50 plan for the District of Columbia and the role of the DC ADAP
